Fibonacci Intervals & Time		Relationship between Discrete and Continuous		
Extensive	34	Minimum syllables per line of text	Extensive Relationship	Unequal: The length of the voice memos (discrete units) do not equal one another or the length of the loops (continuous units).
	55	Maximum syllables per line of text		
Intensive	233	Average syllables per minute in typical American speec	Intensive Relationship	Equal in Aggregate: While there are fluctuations around the BPM in aggregate the tempo (intensive time) of the voice memos (discrete units) correlate to the BPM of the loops on a 4:1 ratio, or as a 16th note does to a quarter note.
	377	Target for accelerated syllables per minute when rapping the text
